

POLYETHYLENE FOAM

THE FLEXIBILITY OF A TAILOR-MADE SOLUTION

FOR CUSHIONING, PROTECTION AND INSULATION

PROTECT YOUR PRODUCTS

- Machining of PE foam packing blocks, in densities ranging from 20 to 150 kg/m³.
- Produced in a 3D machining center, or by removal material
Your packing blocks can be produced on a one-off basis, in small to medium-sized production runs.

APPLICATIONS

- cosmetics
- workstation organization
- automobiles
- carrying case linings
- lean management (5S)
- defense

- Accurate and responsive, this process is highly adaptable to your requirements.
- Available in various colors.
- Antistatic or conductive
Customized foam packing blocks allows the protection of fragile components against electrostatic discharges in an at-risk environment.
