

THE CORES

THE CARDBOARD CORE AS A WINDING SUPPORT

STRONG, ENVIRONMENTAL AND AFFORDABLE

FROM 7 TO 650 MM OF INTERIOR DIAMETER
TO 18 MM OF THICKNESS
FROM 5 MM TO 12 M OF LENGTH

○ Cardboard core

The cardboard core is ideal and cost-effective to roll the products in many industrial sectors.

○ Expertise

Our expertise enables us to optimize the performance of your cores by using the most appropriate processes and raw materials.

○ Equipment

Our production sites are equipped with manufacturing tools and control in order to ensure a high-quality of your products :

- winding machines,
- straight coiling machines,
- recutters machines,
- crimpers,
- laboratories equipped for radial, flat crush tests.

APPLICATIONS

- winding for plastic film, paper, textile, adhesive tape, carpet, label, tissue, etc...
