**70 YEARS OF EXPERTISE
BUILT AROUND YOUR NEEDS**

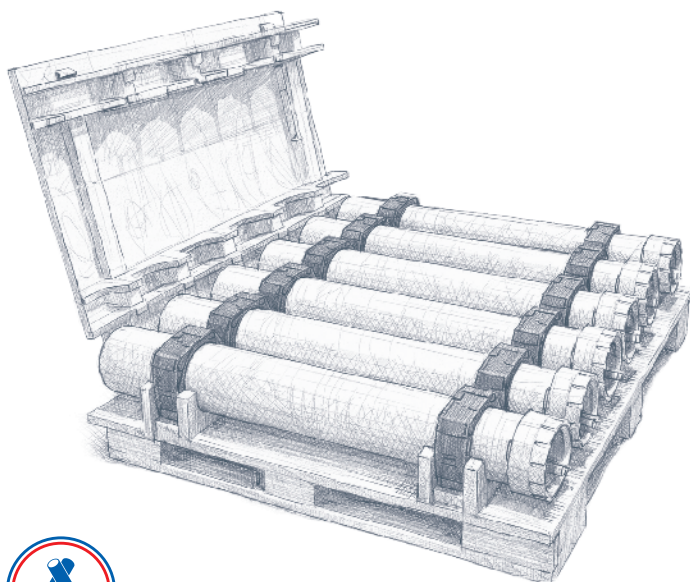

TAILORED SOLUTIONS FOR CRITICAL ENVIRONMENTS

EXPERTISE :

- OVER 70 YEARS OF EXPERIENCE
- CO-DEVELOPMENT
- CUSTOM ENGINEERING

○ Proven expertise

TK Defense designs packaging solutions for the most demanding environments. Based on your technical, operational and industrial requirements, we develop reliable solutions tailored to the protection, transport and secure handling of sensitive equipment.

FIELDS OF APPLICATION

- Defense
- Critical equipment
- Sensitive industries
- Secure transport

○ A co-development approach

We support our clients from the earliest project phases through a co-development process. You define the constraints, we engineer the solution: containers, tubes or foam cushioning systems, fully tailored to your needs.

○ A technical partner

Our teams rely on an in-house technical center and recognized expertise to deliver custom-engineered solutions, integrating operational and manufacturing constraints from the design stage onwards. We act as a committed partner throughout the development of your products.

- Requirements and constraints analysis
- Solution design and adaptation
- Custom containers and foam development
- Technical validation
- Integration of industrial constraints
- Collaborative approach
